

Light 'Em Up

MOTIONLITE puts your rims and ride in the spotlight.

SO YOU'VE SPENT your hard-earned pennies on that brand-new set of rims, and damn do they look good—each cut, spoke or rivet detailed to stand out. No matter how hard you polish 'em, though, once the sun goes down, they're just not gonna shine.

Motionlite addresses this problem by lighting up your blades with their wheel illumination system. Each rim gets a separate LED light mounted on a 6-inch retracting head, which sits in the wheel well.

Hit the button on the supplied key fob, and the lights extend out to showcase each rim in seven different colors—solid, pulsing or as a strobe. The kit is universal, so no matter what you're running, each corner is bathed in color—whether you're stopped with your fellas or rolling down the freeway. And at \$499, it's certainly cheaper than having your own lighting crew. **RON ZARAS**

REALLY DOE RAPPER 1990 CHEVY CAVALIER COUPE

WHAT WAS YOUR FIRST CAR? It was an aqua-green 1990 Chevy Cavalier coupe. My pops brought it home, like, "This is your first car." I wanted rims so bad that I went to AutoZone and put these hubcaps on there, and I would get them shined up like they were rims.

DID YOU MAKE ANY OTHER MODIFICATIONS? My neighbor, George, put a home speaker box out of one of our basements in the trunk. It would drain my battery at times, because it wasn't hooked up properly.

WHY DIDN'T YOU TAKE THE SPEAKERS OUT?

Because I wanted to stunt. You gotta imagine a very young guy riding around in his first car, pulling up in front of house parties. I still got girls off it, so it was what it was.

HOW LONG DID YOU HAVE THE CAR FOR?

A year and a half. I had put water instead of antifreeze into the car [in winter] and blew out the engine. I was on [Chicago's] Dan Ryan Expressway and my car made this loud noise, and this big cloud of black smoke came out. I couldn't even pull over. It stopped right there in the road and had to be towed. **AS TOLD TO YOSHITAKA KONDO**
